PROFESSIONAL SUMMARY

Business Advisory & Analytics professional with 4.9+ years of experience in data analysis, business intelligence, reporting, dashboard development, and stakeholder support. Experienced in translating business requirements into actionable insights, KPI reporting, interactive dashboards, ad-hoc analysis, and executive-level reporting using SQL, Power BI, Tableau, and Advanced Excel. Proven track record of automating recurring reports, improving data accuracy, performing trend analysis, and supporting data-driven decision-making. Strong analytical mindset, attention to detail, problem-solving skills, and experience collaborating with business stakeholders.

PROFESSIONAL EXPERIENCE

Accenture Solutions Pvt. Ltd. | Senior Business Advisory Associate | Dec 2023 – Present

- Develop SQL queries to extract, transform, validate, and analyze large datasets from relational databases for reporting and analytical requirements.
- Automate weekly and monthly reporting processes, reducing manual effort by 40% and improving reporting efficiency.
- Perform data validation and cleansing activities to maintain data quality and accuracy across analytical deliverables.
- Collaborate with business stakeholders to identify KPI requirements, reporting needs, and analytical priorities.
- Generate ad-hoc reports and conduct trend analysis to support business decisions and identify performance patterns.
- Improved data accuracy from 92% to 98% through structured validation and data-quality processes.
- Design executive dashboards used by senior management to monitor KPIs and support data-driven decision-making.
- Develop and maintain interactive Power BI and Tableau dashboards, translating business requirements into actionable insights and management reporting.

Cognizant Technology Solutions Pvt. Ltd. | Junior Data Analyst | Nov 2021 – Dec 2023

- Performed data extraction and reporting using SQL and Excel to support recurring business reporting requirements.
- Built interactive dashboards in Tableau and Power BI for business performance monitoring and analysis.
- Conducted data cleaning and preprocessing activities to improve the quality and usability of analytical datasets.
- Prepared daily, weekly, and monthly business performance reports and supported recurring KPI reporting.
- Supported business teams with data-driven insights and recommendations based on analysis of operational data.
